About Stellar Mold & Tool, Inc.: Founded in 1978, Stellar Mold & Tool, Inc. is a leading manufacturer of precision plastic injection molds. Serving customers nationwide, we strive to be an effective option for producing tooling without having to source from offshore operations. Stellar Mold & Tool, Inc. is dedicated to maintaining sustainable growth to ensure years of continued service.

Primary Details: The ideal candidate will have experience in machine tool, fabrication, maintenance, and/or machine shop operations. The candidate will also need to have an understanding of technical/shop mathematics. A certificate or trade diploma in machine tool operations or related mechanical fields is preferred but not required.

Duties and Responsibilities of the Job:

- The ability to read and understand engineering drawings and blueprints along with basic understanding of 3D engineering software such as SolidWorks or Pro Engineer.
- The ability to use and understand all necessary measuring devices and tools such as: micrometers, calipers, height gauges, depth gauges, indicators, rulers, etc.
- Assist with the assembly and disassembly, alteration, repair, and/or revision of plastic injection mold tooling.
- Assist with the measuring, fit, adjust, and maintain accurate relationships of mold dimensions requiring close tolerances of +/- .001".
- Assist with the construction of fixtures, jigs, and other special items where little to no design is available.
- The ability to assist and learn the set up and operation of all necessary machining tools such as: Bridgeport mills, grinders, drills, etc.
- Ability to coordinate with CNC and EDM regarding specific needs.
- Ability to understand and apply all pertinent quality standards and practices.
- Perform any and all other duties as assigned by department manager or leader.

Benefits:

- Health Insurance
- Life Insurance
- Vacation
- Paid Holidays
- 401K Plan
- Profit Sharing
- Flexible Spending Accounts
- Paid Job Specific Training
- Tuition Reimbursement
